

Off to bed!

What sort of things did your parents say to you that you just had to accept? We are collecting such sayings in as many languages as possible. We want to show them to the whole world, so that parents stop using them. We are publishing these examples on posters, postcards and stickers - we already have posters in German and English.

We need your help!

Please write down all the sayings you can remember. Ask your friends and neighbours. There should be 200 sayings for each language.

They will have to be translated so that other people can understand them. You can choose whatever language you like, but we will need translations into some well-known world language - English, Spanish, French, Russian or German.

Please write legibly so that we do not make any copying mistakes. We have prepared a table with three columns:

In your own language	Word for word translation	Actual meaning

Thank you for your help. Notice our address: <http://gotobednow.com> here you can see what languages we already have.

In your own language	Word for word translation	Actual meaning
